

Added as Libreoffice 6.4 Spreadsheet

Title	Column1	Column2	Column3	Url
Row1	Test11	Test12	Test13	https://de.libreoffice.org/
Row2	Test14	Test15	Test6	https://de.libreoffice.org/
Row3	Test2	Test3	Test4	https://de.libreoffice.org/

When you export this file as pdf, you are not able to click on the links and they will not be opened in a browser.

When you change a value in Calc, they are not changed here

Added as HTML

Title	Column1	Column2	Column3	Url
Row1	Test11	Test12	Test13	https://de.libreoffice.org/
Row2	Test14	Test15	Test65	https://de.libreoffice.org/
Row3	Test2	Test3	Test4	https://de.libreoffice.org/

When you export this file as pdf, you are able to click on the hyperlinks

When you change a value in Calc the will not be updated here

Looks exactly than the Calc table

Added as DDE Link

Title	Column1	Column2	Column3	Url
Row1	Test11	Test12	Test15	Libreoffice Webpage
Row2	Test14	Test5	Test65	https://de.libreoffice.org/
Row3	Test2	Test3	Test4	https://de.libreoffice.org/

When you export this file as pdf, you are not able to click directly on the link to open it in the browser. So you don't know which URL is hidden by the Url "Libreoffice Webpage"

If you change any value in calc, the value is also changed here

The table does not have the same style than in calc
